

### **ASRJ Science Communication Award: Editorial Process**

The Science Atlantic team will connect the winner with the Editor-in-Chief at the ASRJ. One of the ASRJ team members will work with the winner and direct them along the article creation process. Articles typically include an introduction of the researcher and their field of study, a description of the research and a discussion relating to the importance of the research. Once the article has been approved the article will be added to the ASRJ queue for publication. Once added to the queue, it can take between 2 weeks and 2 months to be published depending on the current rate of article production.
